

Harsh Gupta

Seeking full time opportunity starting Dec'25 or May'26 in Data, AI or ML Roles

930-904-3651 – hagupta@iu.edu – [linkedin.com/in/harshg1347](https://www.linkedin.com/in/harshg1347) – github.com/Harsh1347 – [Portfolio](#)

EDUCATION

Indiana University Bloomington

Aug 2024 – May 2026 (Expected)

Master of Science in Data Science (Current GPA: 4/4)

Bloomington, IN

Manipal University

Jul 2017 – May 2021

B.Tech in Electronics and Communication, Minor in Data Science (GPA: 8.13/10)

Manipal, India

EXPERIENCE

Indiana University Bloomington Campus Auxiliaries

Jun 2025 - Present

AI Engineer Intern | Azure, Python, SQL, Tableau, LLM

Bloomington, IN

- **Improved internal knowledge access** by building a **RAG-powered chatbot** with **Azure AI Search and LLMs**, enabling employees to query Confluence documentation efficiently.
- **Automated data pipeline** to extract, clean, chunk, vectorize, & store Confluence pages using HTML parsing and Azure Blob Storage.
- **Enhanced response accuracy** with **reranking & small-to-large context expansion** for better document relevance.

Indiana University Bloomington

Oct 2024 - Present

Part-Time AI/ML Engineer | Azure, Python, SQL, Tableau, LLM

Bloomington, IN

- Developed **time series forecasting pipeline** in Azure, optimizing dining resource allocation from transactional data and **reduced food wastage by 30%**.
- **Boosted accuracy by 21%** by building a data ingestion & feature engineering pipeline in Azure Data Factory.
- **Accelerated prediction pipeline by 6×** using distributed Azure compute, **reducing residual error to 5%**.

Deloitte - Strategy & Analytics

Sep 2021 - Jul 2024

Data Engineer - Financial Sector | AWS, Spark, OracleDB, Postgres

Bengaluru, India

- Built an **AWS-based ETL pipeline processing 15M+ records/day** and developed a reconciliation & error alert system, **cutting manual effort by 30%**.
- Created an **LLM-based insight tool** that empowers non-technical users to query structured and unstructured data directly, **reducing dependency on data teams**.

Data Scientist - Customer Strategy & Pricing | Python, R, Machine Learning, AWS S3, Tableau, Excel

- Delivered **ML-based price strategy, boosting profit by \$1M–\$3M** across 5,000+ stores, while maintaining guest count **loss under 1%**.
- **Streamlined the Pricing-as-a-Service pipeline, boosting efficiency by 30%** and supporting client acquisition through success story presentations.

Samsung Research Institute

Jan 2021 - Jun 2021

Research & Development Intern | Python, Numpy, OpenCV

Remote

- Developed a computer vision algorithm to enhance mobile night sky photography, published a research paper [🔗](#), and received an Excellence Award for innovation.

PROJECTS

TA-Lite [🔗](#) | *Python, Ollama, SQL, LangChain,*

- Developed a **modular AI teaching assistant using RAG** to deliver context-aware, hint-based academic support with instructor-configurable prompts and analytics.

MockChain - AI Agent powered Interview Prep [🔗](#) | *LLM, Langchain, Python, Ollama, Hugging Face*

- **Multi-agent AI-powered mock interview platform** that simulates personalized interviews and delivers actionable feedback based on your resume and job description.

TECHNICAL SKILLS

Programming: Python, R, PySpark, SQL

Cloud & Data Platforms: AWS, Azure, OracleDB, Postgres, Amazon Redshift, Amazon Aurora, Hadoop

Machine Learning & MLOps: Regression, Clustering, Computer Vision, Time Series Forecasting, Deep Learning, Recommendation Systems, Feature Engineering, Model Deployment, CI/CD Pipelines

Generative AI: Langchain, Semantic Kernel, Azure AI Studio, Ollama, Hugging Face, RAG
